

International Network for the Availability of Scientific Publications INASP

Dr. Rami Y. Morjan

What does INASP do?

INASP is an international charity working with a **global network** of partners to improve **access, production, communication and use** of research information and knowledge, so that countries are **equipped to solve their development challenges**

INASP's access initiative

- Work in 22 partner countries, building skills to enable **affordable, sustainable access to research information**
- Work in 28 network countries to provide access to free research information
- Consortia in partner countries make annual selections based on research interests and budget
- Sustainability is key, so we are preparing consortia in partner countries to take over responsibility for access

1. Make an effort to understand the country context
2. Respect a country's wish to negotiate as a consortium or purchasing club
3. Avoid making sudden changes
4. Think medium to long term on pricing
5. Be realistic about sales expectations

Other aspects of INASP's work

- Supporting developing country researchers in **writing up and publishing** their work www.authoraid.info
- Raising visibility of Southern research and addressing quality of Southern journals **Journals Online**
- Strengthening the capacity of **policymakers and practitioners** in the **use of evidence**

INASP'S RESOURCES FOR PALESTINE

INASP negotiates with international publishers for free national licenses for selected e- journals and e-books for West Bank and Gaza

Research literature

Here you can find information on what is available to researchers and students in your country.
